Introduction

The BNP Paribas Group is composed by several entities.

Since January 2016, BNP Paribas has implemented a new “invoice processing” solution that will enable its vendors to benefit from an easier, uniform and faster accounts payable process.

This document was drawn up by the Purchasing Solutions & Accounts Payable Department in collaboration with the Procurement Group. Its purpose is to communicate to vendors a summary of all expected elements in the accounting documents in order to allow an optimal processing, i.e., in the best quality and time standards. The information described is effective for all referenced entities, regardless of the support documentation used (paper or electronic).

BNP Paribas appreciates that these recommendations are taken into consideration, regarding the benefit of all stakeholders.

For more information on invoice tracking, please contact our Help Desk service:

By phone: **+33 (0) 1 40 14 91 11** or by mail: pay4u@bnpparibas.com

In the following pages vendor will find:

- All details that should ideally be included in the accounting documents;
- The impact of each item of information in the overall processing of the accounting documents;
- Specific details, which may – or in some cases must – be included;
- An explanation of the various levels of importance of vendors' information
- How to fill in the address box
- A list with the details to be used for each BNP Paribas legal entity, which invoice reception is centralized with the invoice address and the VAT identification number to be included in vendors accounting documents;
- Two examples of compliant invoices corresponding to the two main situations a vendor will meet: i.e. with or without specific purchase order (in French).

BNP PARIBAS

38	Order number	39	Document date		
40	Contract/file number		Date of service or delivery		
	Cost center		Name of BNPP contact		

Line number	Item code	Name of item	Quantity	Unit price pre tax	Amount pre tax

Total pre tax	VAT rate	Total VAT	Total including VAT
24	25	26	27

29	Payment conditions	30	28	Net payable	34
31	Means of payment	33		Bank details	36
32	Due date		Bank name		
			Account number		
		IBAN			
		BIC	VAT rate		
35	Penalty conditions		Standard penalty		37
	Discount conditions				
	Issuer's legal form and share capital				

In order to interpret the tables in the following pages, below the reading grid for criticality levels.

Mandatory :

This level corresponds to mandatory elements in accordance with the rules of tax dematerialization under Article 289-VII.3 of the CGI as well as the particulars required by BNP Paribas in order to process accounting documents.

Essential :

Lack of reference at this level does not block the accounting document processing, but will significantly impact the process, hence it could lead to misunderstandings and late payments.

Useful :

It will enable a faster processing of the accounting document if this information is included, but if absent, it will not block the process.
